For Immediate Release:

Action Products, Inc. focuses on Infection Control Support Surfaces!

Hagerstown, MD, USA, January 5, 2012: Action Product's new line of replacement table pads and stretchers provide clinically-engineered infection control benefits to the pressure management line of products. "Building on the inherent nature of Akton[®] polymer resisting bacterial growth, we wanted to bring the same quality focus to our expanded line of support surfaces," explains Mistie Witt, President, Action Products, Inc.- Medical Products Group. We recently upgraded and expanded our original composite table pads raising our product offering to ten styles. The complete range of table pads, stretchers and accessories provide exactly what you want, at the price you need.

The Infection Control Design of every product includes: microbe resistant fabrics, 100% no-stitch construction, midline, welded, fluid/waterproof seams and a proprietary hidden vent system. This engineered design keeps fluids out of the pads extending the lifespan of the product and protecting the patient from pathogens. Additional infection control products include a silver fabric upgrade and disposable overlay covers.

All Action[®] Support Surfaces can be seen in our new catalog and on www.actionproducts.com or www.4yourOR.com. To become part of the pressure ulcer conversation, please join our social network at blog.actionproducts.com, [Facebook.com/ActionProducts](https://www.facebook.com/ActionProducts) or [Twitter.com/ActionProducts1](https://twitter.com/ActionProducts1).

About Action Products, Inc.:

Action Products, Inc. is the manufacturer of pressure relieving support surfaces to prevent pressure ulcers. With many pressure and shear reduction qualities, the company was a pioneer in the gel positioning category. Action remains the leader in the industry due to its independent clinical studies proving its effectiveness, and its continuing support of pressure ulcer prevention education. For more information, please visit www.actionproducts.com.
