

PRESSURE TEST #2

C:\FSAI

FSA

presents to seating assessment for Fsa pressure mapping on Low Profile Roho. Frame 1-81 readings recorded on Low Profile. Frame 87-129 readings on new Action prototype 1 cushion (note decreased pressure using Action cushion). EPVA to check with Action products to see about ordering Wilfred a 16Wx16D cushion for Quickie 2 W/C. Pt. presents to seating clinic with left pelvic obliquity, left ankle inversion with right LE not making full contact with the cushion. Pt. complains of excruciating pain and numbness in left UE. Pt. is healing from reconstructive surgery on left buttock. Pt. has history of sores on left buttock, flap surgery done at C.P., surgery at Columbia for left buttock, and reconstructive surgery at Bronx VAMC. Pt. states doctors told him he has a bone protruding at T level. Pt. states his wife assists in lifting him into the bathtub, out of W/C, etc. Pt. would benefit from using a padded shower chair, padded toilet seat, a hand held shower unit, a new Action pressure relieving cushion, a pressure relieving mattress for home use.

*(softer  
2nd layer  
front/back)*

Ref: Eastern Paralyzed Veterans Association 00092 10:03:41.33 11/27/1996  
Jackson Heights, New York

*Left thigh not making complete contact w cushion.*

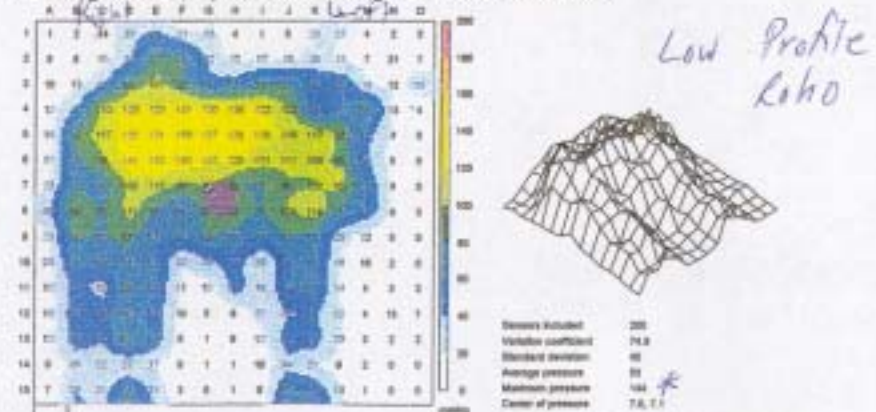

*Pt. weighs 149 lbs.  
Ht. 5'6  
Age: 56  
SCZ: L2,3,4,5*

*No solid seat insert  
was used under  
the cushion.*
