### **For Immediate Release:**

### **Action Products, Inc. debuted new products at the 59<sup>th</sup> AORN Congress.**

**Hagerstown, MD, USA, April 5, 2012:** Action was busy at the 59<sup>th</sup> AORN Congress in New Orleans. Amongst the heavy traffic to the booth, the visitors viewed new disposable chest roll covers and an extended pediatric line. Nurses were excited to see the chest roll covers. Made of the same soft film featured on the Action® reusable positioners, they can speed room turnover time and lengthen the life of the product.

With approximately 80% of the top pediatric hospitals using Action® brand positioners, Action decided to expand the line with two more head pads and three positioners to protect the smallest of patients. Perioperative nurses in the pediatric specialties were thrilled to see development of positioners like these, as even incrementally different sized products are meaningful to improving the quality of care for this patient population.

A revamped Original Table Pad and new Original FT pads were also shown for the first time. “We are proud to support the perioperative community with the largest selection of reusable positioners in the industry,” explains Janet Kaplan, Marketing Director of Action Products, Inc., Medical Products Group. To join the pressure ulcer prevention conversation, please visit our social network at <http://blog.actionproducts.com>, Facebook or Twitter pages.

Action Products, Inc. is the manufacturer of pressure relieving support surfaces to prevent pressure ulcers. As a pioneer in the gel positioning category, Action® products have many pressure and shear reducing qualities. Action remains the leader in the industry due to its independent clinical studies proving its effectiveness, and its continuing support of pressure ulcer prevention education.
